Gorge Lichael Vann N. Vedasto

1. How did you find the exercise in terms of enjoyment, ease, learning, usefulness, etc.?

    At first, I was intimidated by the complexity of the task. However, it got easier the more I understood the = syntax and methods used for typescript for dynamically coding HTML. In conclusion, despite the time-consuming process of learning and reading the documentation for CSS and HTML, it was satisfying to implement and the activity became more fun the longer I worked on it.

2. How long did it take you to finish each item?

    I finished each checkpoint for about an hour each.

3. How could this exercise be improved?

    Lab demonstrations and relevant examples that walks us through in the lab exercise.

4. State until which part of the exercise were you able to finish:
    a. **Checkpoint 1 (Word List Fetching, 30pts)**
    b. **Checkpoint 2 (Hintless Wordle, 30pts)**
    c. **Checkpoint 3 (Barebones Game, 40pts)**
    d. Bonus (Complete Game, +20pts)

    Except for the Bonus part, I finished all the required Checkpoints 1-3.
